

### BZUN (Baozun) Weekly Chart

Stock triggered sell rule on Friday when it traded 20% above the buy point. Since the market is still not that strong, it is best to take gains at 20% rather than try to hold for longer term gains.

Buy point

© StockCharts.com

Stock was sold this week since it is weakening and getting close to 7% loss before next week's earnings report. Since stock is very unlikely to provide suitable profit cushion before earnings report, we decided to sell now instead of wait.

# WHD (Cactus Inc) Weekly Chart

Stock was sold due to insufficient profit cushion before earnings report. We locked in a small profit on this one, although it traded higher after earnings. Since this was the company's first earnings report since going public, we thought that a larger profit cushion than normal was needed.
